Having been a working musician the last 10 years, I find it such a privilege to pass on the skills and insights I've learnt to the next generation. I endeavor to cater to the specific needs of a student, finding what sparked their initial interest in guitar and using that as the motivational foundation for lessons. Real life application is the ultimate goal I work towards with students, and I try to weave this in even while working through basic principles and techniques.

I grew up with Indie-Rock influences like The Strokes, Arctic Monkeys, The Vines and Franz Ferdinand, however have since found a love for the classics such as Stills, Crosby, Nash and Young, Television, Steely Dan, Cat (Yusuf) Stevens and Dire Straits.
