

MARYMOUNT
College
BURLEIGH WATERS

YEAR 10 RELIGIOUS EDUCATION

Year 10 students at Marymount College are exposed to the various ways in which humans have understanding of God or the 'Other'. In the unit **"The Mystery of God"** students become aware that these understandings are ultimately beyond human language, concepts and stories. These understandings include the human experience of the created world; the valuable insights of the major world religions (Christianity, Islam, Judaism, Hinduism and Buddhism) as reflected in their core beliefs and practices; the different representations of God in Old Testament and New Testament texts by various human authors in different historical, social and cultural contexts. Students study the Christian spiritual writings that search for the mystery of God in the midst of world events and the course of human history. They also participate in personal and communal prayer where they engage with God in the created world through contemplation and the simple awareness of the presence of God.

Through the unit **"Responding To The Signs Of The Times"** students explore how the Church has responded to the range of unprecedented threats to human ecology facing Australia and the Modern World from political ideologies. They study various sources including the teaching of Jesus, the principles of Catholic Social Teaching and the reasoned judgements of conscience that are carefully formed and examined. Students are posed with the question: "Do I have the courage to care?" The unit **"Making Amends, Moving Forward"** provides an opportunity for students to examine aspects of science, technology, materialism and consumerism and to develop critical understanding of the various sources that guide the Church's action in the world today. They examine the Eucharist as the primary and indispensable source of nourishment for the spiritual life of believers, who carry on Jesus' mission in the world. Students consider the question: "Are we heading in the right direction?"

In the unit **"Religious Voice In The World"** students consolidate Church teachings as they articulate their own understanding of the nature and purpose of human work, informed by the principles of Catholic social teaching and the relevant early Church teachings of St. Paul. They look at the Church's role in the modern world and how they can contribute to making the world a better place. Students respond to the question: "How can I step up to the mark?" Students continue to develop their understanding of prayer in the Christian tradition through an exploration of Centering Prayer; prayers for justice, peace and the environment, including the Prayer of St Francis, the Magnificat and the Canticle of Creation; and meditative prayer practices, including praying with the help of nature.

CLPS24 Prayers for peace and justice.</p>
	<p>ACHIEVEMENT STANDARD: By the end of Year 10, students describe how the mystery of God can be named and understood. They describe how humans express an understanding of God as revealed in creation. Students differentiate between the core beliefs and practices of the major world religions (Christianity, Islam, Judaism, Hinduism and Buddhism) and describe and identify how these reflect the human understanding of God or the 'Other'. They identify different representations of God from a range of sacred texts and analyse perspectives of those applications for a modern Australian context. Students use evidence from Old Testament and New Testament texts to differentiate between representations of God by various human authors in different historical, social and cultural contexts. They analyse perspectives in a range of Christian spiritual writings to search for the mystery of God in the midst of world events and the course of human history. Students create responses to a contemporary moral question, using evidence from these various sources to support their responses. They evaluate and draw conclusions about the ways in which the Church has responded to a range of emerging threats to both human ecology and environmental ecology. They consider the significance of various sources that guide the Church's action in the world (including the teaching of Jesus and the early Church; the principles of Catholic social teaching and the reasoned judgements of conscience). Students consider the significance of various sources that nourish the spiritual life of believers, including the Eucharist, and individual and communal prayer for justice, peace and the environment. They participate respectfully in a variety of personal and communal prayer experiences, including meditative prayer; prayers for justice, peace and the environment; and meditative prayer practices.</p>
