

Marymount Catholic College School Bus Route Realignment to  
address overcrowding issues - 2023

Kinetic is proposing a new Marymount Catholic College school bus network to meet current passenger loadings & responding to customer feedback by creating matching AM & PM school services with more direct routes creating a shorter trip to/from school. Kinetic is realigning away from the Gold Coast Highway where students can access a high frequency 700 urban service or the Tram (once constructed).

With these changes Kinetic would like to have a consultation period where we invite your feedback to the proposed changes.

Notices targeting students directly impacted by changes are also being sent out via email to Marymount Catholic College & to Students via Driver handouts.

Please send your feedback or questions via an email to: [info@wearekinetic.com](mailto:info@wearekinetic.com)

This presentation will highlight the new proposed routes .

**Issues:**

- Heavy overcrowding occurring on multiple Buses.
- AM & PM services not matching which causes complaints across the network.
- Due to odd number of AM vs PM routes, this causes paths to be intertwined & confusing for passengers & drivers.
- Introduction of Tram services along GC Hwy

**Resolution:**

- Create extra services to assist in a more even distribution of students.
- Create matching AM vs PM routes. This makes the network simpler & easier for Passengers & Driver's to understand.
- Realign services away from GC Hwy enabling passengers to use the high frequency service 700 to connect to designated school bus at certain Hwy stops.
- Kinetic are moving back to following established urban routes with existing stop infrastructure for some school routes due to the continued population growth on the Gold Coast, with suburban streets becoming more congested with residential/business vehicles, parked boats and caravans limiting the actual space that buses can safely stop and load passengers without double parking in some of these streets.
